

DISTRIBUTION CENTRE INVENTORY BY BRAND

Case Study: Warehouse – Multi Brand Retailer

A multi brand retailer required RGIS to complete an **inventory count** within the company's **main distribution centre**

DISTRIBUTION CENTRE INVENTORY BY BRAND

Case Study: Warehouse – Multi Brand Retailer

A Mexican company, with offices in Mexico and Chile, representing and distributing mostly apparel brands.

The customer's products are sold in more than 500 stores in Mexico, in owned stores as well as third party department stores. RGIS have worked with this multi brand retailer for 10 years performing inventories for company's stores.

REQUIREMENT

The multi brand retailer required an inventory count of the main distribution centre. The customer's requirements were:

- **Quantity** of stock by brand and item
- **Location** of stock
- **Separate brands** into different locations within the distribution centre
- Count to be completed within nine days
- **3,400,000 items** to be counted
- To be **completed day and night**

SOLUTION

The multi brand retailer partnered with RGIS to complete the following:

- Scheduled two shifts in 24 hours – one day and one night
- Provided a team of **90 experienced RGIS auditors** per shift
- Counted all required stock by brand
- Recorded area ticket, bin location, barcode and quantity
- Separated brands, so brands were no longer mixed

RESULTS

The multi brand retailer found by outsourcing the distribution centre stock count to RGIS the following was achieved:

- Count completed in four days – **half the time expected**
- The customer now has **stock numbers by brand** as requested
- Inventory **accuracy was 98%**
- Picking within the distribution centre is now more **accurate and efficient**

The multi brand retailer, found by partnering with RGIS the stock numbers are now **accurate**, by brand and location, which has **improved picking accuracy**
