

PLASTICS FACTORY WALL-TO-WALL INVENTORY

Case Study: Industrial – Plastic Products Manufacturer

A plastic products manufacturer needed a solution to complete a **wall-to-wall inventory of the factory within a deadline**

PLASTICS FACTORY WALL-TO-WALL INVENTORY

Case Study: Industrial – Plastic Products Manufacturer

A plastic products manufacturing industry based in Lima, Peru required the support of RGIS. The manufacturer has been producing, marketing and distributing the widest line of plastic products for home, industry and commerce for more than 30 years.

REQUIREMENT

The plastic products manufacturer needed a solution to complete a **wall-to-wall inventory of the factory within a deadline**, so required RGIS to provide the following:

- Accurately **count all plastic items in the factory**
- Work with the **support of the customer's employees**
- Complete the count **within the deadline set**

SOLUTION

The plastic products manufacturer partnered with RGIS to complete the **wall-to-wall factory count project**, and RGIS provided the following:

- RGIS met with the customer prior to the count to **coordinate and plan the project**
- Scheduled a team of **60 experienced RGIS auditors** over three days
- **RGIS teams were supported** by the customer's employees on a 1:2 ratio
- Identified products with **no barcodes**
- **Reported any variances**

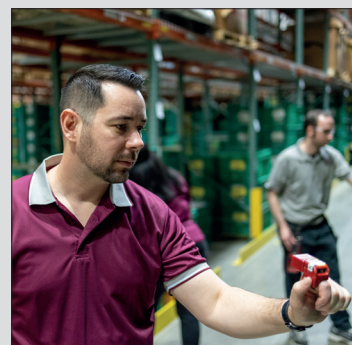

RESULTS

The plastic products manufacturer found by outsourcing **wall-to-wall factory count project** to RGIS, the following results were achieved:

- RGIS teams accurately counted **over 18 million units** and **over 2,000 SKUs**
- Recommendations were made which **improved quality and saved time** during the stock count
- The inventory was carried out **within the deadlines established** by the customer, and the operating and results expectations were also met
- The coordination and planning tasks with the customer **significantly contributed to the success of the inventory**
- **The customer was very satisfied** with service that RGIS provided, and have decided to conduct additional inventories in the factories in Chile

By partnering with RGIS, the plastic products manufacturer now had an **accurate inventory of over 18 million units** in the factory, and were so satisfied with the service provided that they are now **using RGIS for further inventories in factories in Chile**
